Thank you for choosing to to get your hair done at MIT Hair Salon

STUDENTS IN TRAINING

Dear Client

Please remember that our **students are in training**. All care will be taken to ensure a suitable outcome.

Should problems arise we would appreciate you returning within 2 weeks so our students can learn where they went wrong and correct the problem.

Please be aware that our **'Salons' are learning environments** for our students and we will not be bound by time pressures.

Thank you for your co-operation.

Privacy Act

MIT may capture and use recordings of my image, likeness, or voice (e.g. photographs or video recordings) and may use such recordings for educational or commercial purposes (which may include publication). I further agree and acknowledge that MIT exclusively owns any such recordings and that I will not be compensated for their use.

Patch Test for Colour Service

Don't chance it, test it!

Paraphenylenediamine (PPD) is contained in most hair dyes, which is known to cause allergic reactions in sensitised people. A simple test can detect those most at risk to serious allergy to PPD. It is simple and easy to apply ~ just 48 hours prior to your service. Ask Hair at MIT for more information.

Possible signs of allergic reaction:

- **Redness**
- **Body rashes**
- **Blisters**
- **Weeping burns**
- **Swelling of the head and/or face**

Why did I get an allergic reaction?

- Use of non-professional hair colours at home, which may contain increased levels of PPD.
- Colouring hair from an early age may increase the risk of sensitization to PPD and PDTs which can result in subsequent allergic reactions.
- Prior use of temporary tattoo's or permanent tattoo's with inks containing PPDs.
- Atopic skin disorders such as eczema.

WARNING

If an allergic reaction occurs, remove the colour with soap and water at once.

Please Note

- ***All colour services are required to undergo a complimentary allergy skin test no less than 48 hours prior to the appointment. Ideally you should have the test before every colour service; as with allergies to food or medicines, allergies to hair colour can develop at any time, even if you have never had a reaction before.***
- ***Please understand this is a training salon and services may take longer than usual. All work is carried out by students who are fully supervised by tutors.***
- **Additional Charges may apply for Extra thick or Extra long Hair**
